Publishing Office

Pergamon Press plc, Pergamon House, Bampfylde Street, Exeter EX1 2AH, England [*Tel.* (0392) 51558; *Fax* 425370].

Advertising and Subscription Offices

North America: Pergamon Press Inc., Fairview Park, *Elmsford, NY 10523, U.S.A.*
Rest of the World: Pergamon Press plc, Headington Hill Hall, Oxford OX3 0BW, England [*Tel.* (0865) 794141; *Fax* 60285].

Annual Subscription Rates 1991

Publication frequency: 24 issues per year (two volumes per annum)

Annual institutional subscription rate, DM 2040.00; 2-year *institutional subscription rate, DM 3876.00* (including postage and insurance). A personal subscription rate for *those whose library subscribes at the regular rate is avail*able on request. Members of the *American Mathematical Society* may order personal subscriptions at a concessional *rate, details of this rate are available upon request.* Subscription rates for Japan include despatch by air and prices *are available on application. All prices are subject to* amendment without notice.

Back Issues

Back issues of all previously published volumes, in both *hard copy and on microform, are available direct from* Pergamon Press offices.

List of Contents

NUMBER 1

HUNGARIAN APPLIED MATHEMATICS
SELECTIONS

M. Arató and T. Szántai	vii	Preface
A. Benczúr, A. Kiss, and T. Márkus	1	On a general class of data dependencies in the relational model and its implication problems
J. Demetrovics and N. X. Huy	13	Closed sets and translations of relation schemes
J. Demetrovics, L. Rónyai and N. S. Hua	25	Dependency types
E. Egert	35	The model RAS and its sensitivity analysis
I. Farago	49	Finite element method for solving nonlinear parabolic systems
I. Farago	59	Finite element method for solving nonlinear parabolic equations
Cs. J. Hegedüs	71	Generating conjugate directions for arbitrary matrices by matrix equations I.
Cs. J. Hegedüs	87	Generating conjugate directions for arbitrary matrices by matrix equations II.
V. Kertész	95	Partial stability investigations of differential equations of second order
T. Illés	103	Optimality criteria for general unconstrained geometric programming problems
V. Kertész	111	Conditions for the existence of solutions converging to zero in the case of homogeneous linear differential equations
A. Kiss	119	The application of the separation principle for the linear continuous systems with coloured noise
J. Kormos	129	Hypothesis testing for nearly nonstationary AR(1) model with Gaussian autoregressive innovation
A. Sebö	137	A particular timetable problem: Terminal scheduling
L. Telegdi	157	Investigation of the structure of binary variables
	I	Softstrip® data strip containing the table of contents of this issue

NUMBER 2/3

	iii	Softstrip® data strip containing the table of contents of this issue
S.S. Lin and F. C. Lin	1	An O(log n) algorithm for computing periodic continued fraction and its applications
P.A. Ramachandran	7	Boundary integral solution method for diffusion-reaction problems with both material and rate nonlinearities
K. Coolsaet and V. Fack	15	Classifying strongly regular graphs using lexical ordering of adjacency matrices
M.M. Mohie El-Din	23	Estimation of the mean and standard deviation of Burr distribution by order statistics
P. Glaister	29	An efficient finite difference scheme for three-dimensional, non-equilibrium flows using operator splitting
J. van der Jeugt and V. Fack	39	The Pragacz identity and a new algorithm for Littlewood-Richardson coefficients
M. Sniedovich	49	Solution strategies for variance minimization problems
W. Chai, K. Gu, and N.K. Loh	57	Transforming time-varying multivariable systems into block companion canonical forms
N.I. Ioakimidis	69	The location of discontinuity intervals of sectionally analytic functions: Application to the interface crack problem
Q. Zou and A.G. Ramm	75	Numerical solution of some inverse scattering problems of geophysics
H.H. Kagiwada, J.K. Kagiwada and R.E. Kalaba	81	Associative memories for third-generation passive ranging
F. Feuillebois	87	Numerical calculation of singular integrals related to Hankel transform
S. Ruan	95	Oscillations of n-th order functional differential equations
C.J. Lin	103	Generating subsets of a systolic array
N. Hashimoto	111	Numerical algebraic surfaces
E.H. Doha	115	The coefficients of differentiated expansions and derivatives ofultraspherical polynomials
M.D. Gunzburger, L. Hou and T.P. Svobodny	123	Finite element approximations of an optimal control problem associated with scalar Ginzburg-Landau equation
P.M. Binder	133	Machine iteration of a linear function: local behaviour
J.C. Misra and S. Roy	141	Mathematical analysis of a specimen of tubular bone subjected to torsional loading

M. Rouff and W.L. Zhang 149 An application of REDUCE: the elimination process for bilinear or linear systems

M. Sniedovich 159 A machine executable generalized inner product and its applications

O. Egecioglu, Ç.K. Koç and J.R. Coma 167 Fast computation of continued fractions

H. deMeyer, G. vanden Berghe and J. Vanthournout 171 Modified backward differentiation methods of the Adams-type based on exponential interpolation

M.S. Petkovic and L.J. Cvetkovic 181 A hybrid method for a polynomial complex zero

K.-L. Chung, F.-C. Lin, and Y.-N. Yeh 187 A three-phase parallel algorithm for solving linear recurrences

N. Mauser, A. Arnold, and P.A. Markowich 197 The self-consistent Bloch-equation in one dimension

NUMBER 4

S. Ganesan, L. S. Shieh and M. M. Mehio 1 Sequential design of linear quadratic state regulators with prescribed eigenvalues and specified relative stability

K. J. Bunch and R. W. Grow 11 A technique to shift an eigenvalue of a complex matrix to accelerate convergence of the power and inverse power method

B. N. Mandal and P. K. Kundu 17 A note on the transmission of oblique waves through small apertures

G. D. Tsiotras 23 Exact analysis of the joint production quantity-quality of a two-station stable tandem manufacturing system with restricted capacity

M. M. Mohie El-Din 33 Maximum likelihood weights of the location of the Burr distribution

P. Glaister 39 A non-uniform mesh scheme for compressible flow

D. Wang 63 Semi-discrete Fourier spectral approximations of infinte dimensional Hamiltonian systems and conservation laws

R. J. Tait, K. Abdella and D. B. Duncan 77 Approximate Riemann solvers and waves on a nonlinear elastic string

91 Book Reports

NUMBER 5

HYPERBOLIC PARTIAL DIFFERENTIAL EQUATIONS VI

M. Witten	vii	Preface
T. V. Kostova and N. H. Chipev	1	A model of the dynamics of intramolluscan trematode populations: Some problems concerning oscillatory behavior
T. H. Barr	17	Approximation for age-structured population models using projection methods
F. Bloom	41	Long time existence of solutions for
J. É. Castillo	57	An adaptive direct variational grid generation method
L. Haws	65	Symmetric Green's functions for certain hyperbolic problems
C. S. R. Murthy	79	Solving hyperbolic PDEs on hypercubes
M. Santiago and D. R. Kincaid	83	Using cyclic reduction on a parallel computer to improve performance of an underwater sound implicit finite difference model
B. A. Kuperschmidt	95	For-variance upon relativisation of the Hamiltonian structures of fluids in not universal
G. Adomian	101	A review of the decomposition method and some recent results for nonlinear equations
K. Kreith	129	A selfadjoint problem for the wave equation in higher dimensions
G. Adomian	133	The Sine-Gordon, Klein-Gordon, and Korteweg-De Vries equations
J. Scroggs	137	An iterative method for systems of nonlinear hyperbolic equations

NUMBER 6/7

GLOBAL OPTIMIZATION, CONTROL AND GAMES

E. A. Galperin	vii	Preface
E. A. Galperin	1	Problem-method classification in optimization and control
V. K. Chichinadze	7	Solution of nonlinear nonconvex optimization problems by ψ-transformation method
Q. Zheng	17	Robust analysis and global optimization
R. E. Moore	25	Global optimization to prescribed accuracy
H. Ratschek and J. Rokne	41	Interval tools for global optimization

S. G. Mentzer	51	LP-form inclusion functions for global optimization
H. P. Benson and R. Horst	67	A branch and bound-outer approximation algorithm for concave minimization over a convex set
B. Benchekroun and J. E. Falk	77	A nonconvex, piecewise linear optimization problem
P. M. Pardalos	87	Global optimization algorithms for linearly constrained indefinite quadratic problems
S. S. Erenguc and H. P. Benson	99	An algorithm for indefinite integer quadratic programming
P. M. Pardalos and S. Jha	107	Graph separation techniques for quadratic zero-one programming
Y. Yavin	115	Optimal launch conditions: An optimal stochastic control problem
B. Betrò and F. Schoen	127	A stochastic technique for global optimization
M. M. Kostreva and L. A. Kinard	135	A differential homotopy approach for solving polynomial optimization problems and noncooperative games
E. A. Galperin and Q. Zheng	145	Integral global optimization method for nonlinear games
G. R. Wood	161	Multidimensional bisection applied to global optimization
M. Piccioni	173	A combined multistart-annealing algorithm for continuous global optimization
C. J. Zappe and A. V. Cabot	181	The application of generalized Benders decomposition to certain nonconvex programs
M. D. Ašić and V. V. Kovačević-Vujčić	191	An implicit enumeration method for global optimization problems
C. Deissenberg	203	Interactive search for a global optimum in macroeconomic policy-making
E. A. Galperin	215	The integer cubic algorithm

NUMBER 8

D. Sculli and Y. W. Shum	1	An approximate solution to the PERT problem
S. B. Pomeranz	9	Computational methods for nonlinear elliptic eigenvalue problems
R. P. Agarwal and P. J. Y. Wong	21	Optimal error bounds for the derivatives of two point hermite interpolation
C.-K. Chen and T.-H. Hsu	37	Heat transfer of a thermomicropolar fluid past a porous stretching sheet

J. F. Andrus	47	Formulas for modular integration of systems of ODE's
P. Diamond	57	Iterated maps on discretized meshes of the unit interval
G. Neumann	65	Interpretational abstraction
J.-C. Luo and **M. B. Friedman**	79	A study on decomposition methods
A. G. Ramm	85	Finding conductivity from surface measurements
A. A. Tsonis	93	The effect of truncation and round-off on computer simulated chaotic trajectories
	95	Book Reports

NUMBER 9

P. Fjelstad	1	Extending Pascal's triangle
P. Fjelstad	5	Pascal's triangle on a torus and on a binary tree
P. Fjelstad	11	The binomial theorem and the extended Pascal's triangle
R. B. Adeniyi and **P. Onumanyi**	19	Error estimation in the numerical solution of ODE with the Tau Method
R. E. Carlson and **T. A. Foley**	29	The parameter R^2 in multiquadric interpolation
A. Lu and **E. L. Wachspress**	43	Solution of Lyapunov equations by alternating direction implicit iteration
R. P. Srivastav and **F. Zhang**	59	Solving Cauchy singluar integral equations by using general quadrature collocation nodes
	73	Book Reports
	I	*Software Survey Section*

NUMBER 10

J. M. Wolff and **S. Fleeter**	1	Analysis of the viscous aerodynamics of a thin airfoil cascade by a locally analytic method
J. R. Mika and **A. Palczewski**	13	Asymptotic analysis of singularly perturbed systems of ordinary differential equations
K. A. S. Abdel-Ghaffar	33	The number of convolutional codes of span one
R. S. Berry	39	Symmetry in atomic and molecular systems
W. R. Thissell and **P. L. Mills**	53	Some applications of computerized symbolic manipulation in the analysis of chemical engineering systems
M. B. Barnett	79	Summing $P_n(\cos\theta)/p(n)$ for certain polynomials $p(n)$

NUMBER 11/12

FOURTH INTERNATIONAL WORKSHOP OF THE BELLMAN CONTINUUM

E. S. Lee	vii	Foreword
W. Ueno and A. P. Wang	1	Invariant imbedding and searchlight problem in turbid slab
S. K. Srinivasan and R. Vasudevan	7	Abstract—Particle multiplicity distribution a la invariant imbedding and natural scaling
G. Naadimuthu and E. S. Lee	9	Invariant imbedding filter in the modeling of water resources
S. Iwamoto	23	Iterative integral versus dynamic programming
A. Lew	41	Reduction of dimensionality of an optimal decision table conversion algorithm
D. Li and Y. Y. Haimes	51	Extension of dynamic programming to nonseparable dynamic optimization problems
M. Kurano	57	Functional characterization for average cost Markov decision processes with Doeblin's conditions
T. Odanaka	65	Control chart and stochastic control process
T. Ojika, T. Hashimoto and Y. Izumoto	79	Nonlinear time optimal control of rotating rigid body
D. Jacobs and S. M. Meerkov	85	Asymptotically reliable serial production lines with a quality control system
W. Rosa-Hatko and E. Gunn	91	Some models of queuing control with switchover
A. Lew	111	Fuzzy decision tables for expert systems
A. O. Esogbue	117	Computational aspects and applications of a branch and bound algorithm for fuzzy multistage decision processes
A. Melton and S. Shenoi	129	Fuzzy relations and fuzzy relational database
A. Repaci	139	A nonlinear inverse heat transfer problem
E. D. Denman	145	Projectors, solvents, interpolating polynomials and lambda matrices
G. Naadimuthu, K. W. Wang and E. S. Lee	153	Air pollution modeling by quasilinearization
L.-J. Lin	165	Duality theorems of vector-valued n-set functions
